OBJECTIVE

Seeking a junior web developer position where I can utilize my skills learned during the Coder Academy BootCamp to create visually appealing and user-friendly websites. I am a quick learner with a particular interest in front-end development. I enjoy working either independently or with others, I have always had great relationships with my co-workers and it is a priority to continue making connections at work.

EDUCATION

Diploma of IT   **2023**
Coder Academy

MY SKILLS

GIT	Flask
HTML	Express
CSS	MongoDB
JavaScript	React
Python	Node
Postgresql	

PROJECTS

Roster API
Python | Flask | PostgreSQL
An API built to store employee data and allow managers to assign shifts to employees and group shifts into weekly rosters.
Github Repo

Dog Manager CLI
Python | Sqlite 3
A simple CLI app for a dog hotel to manage information. Allows users to save, edit and get data from the terminal using the Sqlite 3 module.
Github Repo

Portfolio
HTML | CSS
My first assessment project was great for experimenting with responsive web pages and design.
Github Repo
